

JLMS has been designed from the outset to integrate with other systems. This provides easy access to other courseware, user information or a seamless internal course access environment. The architecture of JLMS makes this integration painless. Some of the integrations available are:

- **Global Mentoring**
 - www.globalmentoring.com
 - *“Real-Time Mentoring™ provides direct, online access to live experts and resources for help with course study, daily work activities, and topics relating to information technology, desktop applications, and business skills.”*
 - This can be made available for easy access from inside JLMS.
- **Safari Books**
 - www.safaribooksonline.com
 - *“Safari offers a robust collection of e-reference libraries to programming and IT professionals, business managers and general knowledge workers.”*
 - This can be made available for easy access from inside JLMS.
- **Books24x7™**
 - www.books24x7.com
 - *“Referenceware®, from Books24x7, offers a revolutionary approach to problem solving and learning by providing searchable, online access to the full, unabridged contents of thousands of business and technical books, as well as to expert summaries of popular business books.”*
 - This can be made available for easy access from inside JLMS
- **Self Test™**
 - www.selftestsoftware.com
 - *“Self Test Software’s extensive offering of high-quality test prep products for IT certification ensures that certification candidates have the tools they need to tackle testing.”*
 - This can be incorporated into JLMS for pre-testing access to courseware.
- **Blackboard**
 - www.blackboard.com
 - *“The Blackboard Academic Suite™ is a complete family of enterprise-grade software applications that support teaching, learning, and campus life.”*
 - Through the provision of a BlackBoard building block, Smartlogin and JLDAP, we are able to make online courseware available through the blackboard system, whilst using the JLMS to run, track and score all course usage. It provides the power of JLMS through the Blackboard interface which is familiar to many university students.
- **Search And Select/ Search Now**
 - www.netg.com/Technology/enhancements/searchnow.asp
 - *“Learners simply enter a natural language question and the Search Now system instantaneously returns a list of knowledge resources”*
 - This can be made available for easy access from inside JLMS
- **JLDAP/SmartLogin System**
 - LDAP system can be connected to JLMS through the use of our product JLDAP. This allows connection to existing user databases, such as Windows and Novell. Alternatively text files can be provided. Scenarios have previously included:
 - Windows User Database; Novell Users
 - PeopleSoft Users; Blackboard; SAP and many other systems
- **Other third party links.**
 - Other material can easily be added to the JLMS user’s menus through simple linking to web link and is fully admin configurable.
- **Intranet**
 - With the addition of SmartLogin, users can get one click access to start a course that the whole company must complete, direct from the company intranet.
