

JLMS 4.0 now includes a comprehensive training events system that is fully integrated with eLearning, allowing scheduling and managing of class based training events for a blended solution. This allows integration of in-person event with eLearning for a complete learning solution. Together with the Resource Management system, you have all your learning Management Tasks in one place.

- Instructors can post Training events to the system, and this can be accessed and booked online by students
- Training events can include:
 - In person attended events
 - Classrooms
 - Seminars
 - Live web cast events
 - Recorded web-cast events
- A resources managements system is available, allowing management of items such as classroom, projectors, computers etc. Users can request access to any items;
- Multiple venue types are allowed, such as Conference Hall, Learning Centre, and Meeting Rooms.
- Both In-House and External training events are allowed
- Events can be categorised in two customisable ways, such as:
 - Core, Function, Leadership, Programming, Specialised
- Both internal and external instructor can be given access to the system, with different access level to each.
- Event Co-ordinator has separate user type with different access.
- Event have predefined subject areas
- Information held about each event includes:
 - Event Type
 - Event Designer/developer
 - Subject
 - Location
 - Event Owner
 - Expense Types
 - Event Supplier, and there full details
 - Currency and cost detail is kept for analysis.
 - Time Zone
 - Validity
