

JLMS 4 has a comprehensive registration and information storage facilities. This has been built to facilitate the needs of the small business through to the largest corporations and universities, and has flexibility that will satisfy everyone's requirements. This flexibility will allow you to configure a LMS that only requires a user's LoginID, or one that captures all the information about a student. With the addition of SmartLogin, even a LogonID is not required, providing zero barriers to begin the learning experience.

- Fully configurable User fields can include:
 - Full names details, including Nickname and Known As Name;
 - Full Home & Business addresses;
 - Home, Mobile and Business Phones;
 - Gender, Race, Birthdates;
 - Hire/Start dates, Termination date;
 - Standard grouping, such as Region/ Country/ Business/ Divisions/ Function;
 - Relationships between standard groupings can allow limited drill-down type hierarchies;
 - 13 different admin customisable groupings, which can be used for any data that will be particular to your business/institution;
 - Different users types, such as Temporary, Permanent, Contractor, Part-time;
 - Domain IDs, for situations when system is linked to another system, such as Windows, Novell or Blackboard;
 - Employee Number;
 - Business and personal email, and preferred email;
 - Managers Name;
 - Time Zone, Preferred language;
 - Multiple custom text and date field come as standard to use for any use;
 - System access start and end dates;
 - Profiles access, shared profiles, photo;
- The above fields can be configurable to Active, Mandatory, Shown To User, Read-Only, Reportable, or restricted to use by Managers or Admin;
- The User Login experience is flexible including:
 - Providing of two LoginID, one for work/university, and one for home use;
 - Providing two different login pages for same scenario;
 - Password complexity can be set, to compulsory include special character and numbers, with a minimum length;
 - Multiple access of same user at same time can be restricted;
 - Automatic sending of joining email;
- Different Users Types are available and configurable, including as standard:
 - Students;
 - Managers;
 - Instructors (Internal and external allowed with different functions for each);
 - Group Level Admin;
 - General Admin;
 - Super Admin (For use by JZero or authorised technicians only)
- Standard groupings such as Business, Region, Division, Country and Functions can allow the managers selections to be narrow down by previous selections.
- SmartLogin and JLDAP systems are also available, these provide access to:
 - Automatic and seamless logon to JLMS using Windows, Novell, Blackboard or any other HR system UserID.
 - Automatic data load from any of these systems, of any and all user's data through JLDAP connections or text files.
